# FREDERICK WHITLO HIXSON, D.D.

President.

REV. RICHARD M. MILLARD, A.M., B.D.

Dean.

Social Sciences and Bible.

A. B., University of Chattanooga, 1910; B. D., Drew Theological Seminary, 1912; A. M., University of Tennessee, 1916; present position since 1916.

## DAVID ALEXANDER BOLTON, A.M.

Mathematics.

A. B., 1872, A. M., 1875, East Tennessee Wesleyan University; Professor in Alma Mater, her successors, since 1873.

# E. C. FERGUSON, A.M., Ph.D.

History and Latin.

A. B. and A. M., University of Vermont; Ph. D., Boston University; present position since 1890.

MISS JENNIE ROBERTS, A.M.

Latin.

A. B., Chaddock College; A. M., Illinois Wesleyan University; present position since 1905. - to 1918 - 13 years

MISS EDA SELBY, A.M.

Modern Languages.

B. B., Oxford College for Women; A. M., Miami University; present position since 1905.

## ALVIS CRAIG, A.M.

Mathematics and Education.

A. B., 1896, Grant University; A. M., 1904; present position since 1906.

MISS FRANCES CULLEN MOFFITT, M.B.

Director of Music, Piano and Harmony.

M. B., Franco-Americano Conservatory of Music, Brooklyn, N. Y.; present position since 1905.

MRS. NELLIE P. HEDGE,

Teacher of Voice.

Oldhan Conservatory, New York City; present position since 1907.

MISS CAROLYN A. JENKINS,

Superintendent Ritter Hall.

Lucy Webb Hayes Training School, 1902; present position since 1910.

Foss Smith, A.M.

Chemistry and Physics.

A. B., 1905, University of Chattanooga; Graduate Student University of Tennessee; present position since 1911.

MRS. HELEN MCKELDIN,

Fine Arts.

Student under Carl Marr, of Munich; present position since 1915.

ROBERT W. GOFORTH, A.B.

English.

A. B., 1915, University of Chattanooga; present position since 1916.

Frank C. Grannis, B.S.

A griculture.

B. S., 1910, University of Illinois; present position since 1916.

# MISS ELIZABETH WILSON,

Domestic Arts.

Student American School of Home Economics, Chicago.

MISS MABEL STIFFY, B.S.

Domestic Science.

B. S., 1915, Ohio State University; present position since 1916.

MISS MARCUS CARTHON,

Teacher of Violin.

Graduate Cincinnati Conservatory of Music; present position since 1915.

MISS GLADYS GARNER,

Commercial Subjects.

Graduate Grand Prairie Seminary, 1915; present position since 1915.

# GENERAL INFORMATION

The University is under the auspices of the Methodist Episcopal Church; however, in practice, denominational lines are never drawn. Christian culture is that for which it stands, and students from other churches, and from no church, are treated with equal consideration.

The University has departments located both at Athens and Chattanooga, Tennessee. The President is the chief executive of the entire institution. Each school, however, has a dean, to whom the details of administration are entrusted. This catalogue relates only to the departments at Athens.

#### LOCATION.

Athens is a town of about three thousand inhabitants. It is situated on the Southern Railway, midway between Knoxville and Chattanooga. The L. & N. Railway has a terminal in Athens, and will doubtless make extensive improvements. Athens has an altitude of about 900 feet above sea level, and has the natural advantages of pure air and water. It is free from epidemic diseases. The weather is mild, and every condition is favorable to study.

In point of morals, also, it can hardly be excelled, being remarkably exempt from all temptations of vice. There are four Protestant churches here. The citizens are cultured and refined, and are ready to extend any kindness to our students. As a student home, therefore, we are prepared to represent Athens as equal to any other location in the South.

BANFIELD SCIENCE LABORATORY

THE CHAPER - First Santeline of Eines

### GROUNDS AND BUILDINGS.

The campus embraces about twenty acres, and upon it are situated the Old College Building, Chapel, Bennett Hall, Elizabeth Ritter Hall, C. H. Banfield Memorial Hall, Petty-Manker Hall, Hatfield Hall, Blakeslee Hall, and several cottages.

THE C. H. BANFIELD MEMORIAL HALL, erected by Mr. William Banfield, is a magnificent structure of brick and stone and most admirably adapted to its purpose. It contains the offices, recitation rooms, laboratories, library and girls' society halls. It is heated with steam and lighted with electricity.

BLAKESLEE HALL is the gift of Mr. and Mrs. C. S. Blakeslee. It has been thoroughly overhauled and is occupied by the Dean as a residence.

Bennett Hall is one of the dormitories for young ladies. We seek here to develop those tastes and habits which, supplementing intellectual culture, conspire to make the true woman. Girls boarding here furnish their own bed linen. The charges are \$3.50 per week when two occupy one room; or \$4.50 per week, when a girl rooms alone.

THE ELIZABETH RITTER HOME AND SCHOOL was founded and is maintained by the Woman's Home Missionary Society. It provides training in the various branches of household economics, and furnishes a safe and comfortable home for the girls attending the Athens School. The home was opened in the Autumn of 1891. The first year it enrolled thirty pupils, but the annual enrollment for recent years has been one hundred or more, with many on the waiting list.

The School having outgrown the accommodations, in 1906-07, an annex, the Caroline C. Frazier Hall, was built. This contains twenty-five rooms, including a large dining room and a chapel which will seat one hundred.

The home is lighted by electricity and heated by steam, the en-

gine and boiler being outside the building, thus lessening the danget from fire. Excellent fire escapes are permanently attached to the building.

For the purpose of aiding girls in securing an education and of giving training in domestic industries, Ritter Home is conducted on the co-operative plan. The members of the household have their daily duties, which are so distributed and directed as not to interfere with the school work. In connection with these duties, correct housekeeping is taught.

A small amount of student aid will be given to well recommended girls in need of temporary help; only those will be considered who are prompt and regular in attendance and whose class work and deportment are satisfactory.

Besides general housekeeping duties, special courses will be given in the following domestic industries: Plain sewing and dressmaking; household economics; sanitation and health.

The courses in sewing are as follows:

- 1. Elementary Sewing. Stitch forms, hemming, seams, bands, sewing on buttons, hooks and eyes, patching, darning, etc. Four periods per week.
- 2. Advanced Sewing. The making of undergarments, shirt-waists, skirts and dresses. Four periods per week. Students are required to furnish all working materials. Fees for students not living in Ritter Home, \$1 per semester.

In the sewing department each girl is allowed to put a part of her time in the sewing classes upon her own wardrobe, so that she can be well dressed for the mere cost of materials.

The Department of Household Economics consists of the following courses:

1. A study of foods and the principles involved in their preparation. Two double periods per week. Laboratory fee, 50 cents per semester.

- 2. A study of the home, including an elementary course of Household Sanitation, Management and Decoration. Three recitation hours per week.
- 3. A continuation of Course 1, including work in advanced cooking, and the planning and preparation of meals. One afternoon per week. Laboratory fee, \$1 per semester.

A limited number of pupils not living in Ritter Home will be admitted to courses in Household Economics at a special rate of \$3 per semester.

Instruction in sanitation and health is also given in the form of lectures by members of the faculty and local physicians. The pupils are required to take notes and at the end of the course pass in their note-books for grading.

Regular hours for work and rest, with plain food, has thus far resulted in a remarkable degree of health among the pupils. By the generous gift of the late Captain H. S. Chamberlain a beautiful sunny room has been fitted up for the use of any who may be temporarily ill.

At the request of many patrons of the school, and by the unanimous vote of the pupils, a uniform dress has been adopted for street and church.

That the dress may be uniform and of good material, the suits will be furnished at wholesale prices to pupils after they arrive at the school. They consist of skirt, coat and college cap, and will be made to individual measurement at the factory and sold to the pupils at the factory cost, not exceeding twelve dollars. The superintendent should be informed early in the summer vacation regarding individual measurements.

Parents are advised not to spend money for a variety of clothing for their daughters. A good supply of underwear and shoes, a pair of rubbers, and an umbrella are essentials. Each girl should bring eight yards of good gingham or two work aprons, which can be cut and made in the sewing room after her arrival. White shirt

waists, which are part of the uniform in warm weather, are also to be made in the sewing room of material brought by pupils or procured at the school. All clothes should be plainly marked, and every girl should have a laundry bag and an ironing pad with name on each.

In consideration of each student taking her share of the household duties, averaging about an hour per day, the price for room, board, fuel, lights and laundry privileges is \$8 per month.

Board bills must be paid monthly, and bills will not be allowed to run more than three months.

Arrangements must be made for tuition in the classes of The Athens School before admission to the Home, as the Home is in no wise responsible for these bills. It is simply a home for girls of the school, in which they also get training in the domestic arts.

For information in regard to tuition and incidental fees in the Athens School, Address Dean, Athens School, Athens, Tenn.

Prompt and regular attendance is most important. All pupils should be in their places when the classes are organized at the opening of the school, and plans should be made to remain until the end of the school year. Without this, money spent for travel and tuition is largely wasted.

No reduction will be made on board bills for any period less than a month.

The Ritter Home and School has plenty of interests and healthful recreation. On Sunday there is a church service and Sunday School in the morning, and Epworth League in the afternoon.

A Home Missionary Circle, and two Literary Societies furnish original literary work.

The gymnasium, basket ball and tennis give fine physical training, which, with frequent socials, picnics, etc., provide agreeable relaxation.

Parents sending their daughters to Ritter Home are assured that they will be cared for, morally and physically, as they would be in their own homes. Applications are so much more numerous than the house can accommodate that early applications should be made. Methodists will do well to consult their pastor as to the comparative merits of schools. When girls are in the formative period of life, it is very important that all the influences about them be favorable to culture and refinement, and that they receive a strong impulse to useful, unselfish, and religious lives. Nowhere in the South are the best influences more potent in the formation of character than in the Elizabeth Ritter Home. For a catalogue send to Miss Carolyn A. Jenkins, Superintendent of Elizabeth Ritter Home and School.

Petty-Manker Hall is the newest building on the campus. This fine four-story brick building has cost the Institution over twenty-five thousand dollars. There is perhaps no better dormitory for boys in the country, as every convenience is provided. It has been impossible to accommodate all the young men who wished to enter this new hall.

The rooms here are well furnished and comfortable. Two single beds with springs and mattresses, chiffonier, combination table and book case, chairs and rugs constitute the furniture of each room. Steam heat, electric lights, hot and cold water faucets greatly enhance the comfort and convenience of these rooms. In addition to these features are good light, good ventilation and ready access to shower baths on each floor.

A competent matron is in charge and one of the professors also rooms in the building. There is a large general dining-room on the first floor that will accommodate one hundred young men and women. Last year this board was furnished at the unusually low rate of \$8.00 per month. The rate in this building for rooms is \$3.50 per month for each boy where two boys room together. The best of order is kept. No smoking or chance games or profanity are permitted in this building.

HATFIELD HALL has been thoroughly remodeled and the rooms made comfortable and sanitary. It is in reality, now, a new dor-

mitory. All necessary furniture, except bedding, is furnished by the school. Good stoves, electric light, and fuel, together with shower bath and all other necessary conveniences are offered here at the very low rate of \$2.25 per month for each student where two occupy the same room. This building is also in charge of a competent matron. Young men rooming at Hatfield Hall may take their meals at Petty-Manker. If, however, a majority of the young men desire, a Co-operative Boarding Club may be organized and the large dining-room in the basement of Hatfield Hall utilized.

Girls are expected to board at Ritter Home or Petty-Manker Hall. Any exception to this must be by consent of the Dean, upon the written request of the parents. Private board, including furnished room and fuel, can be secured at a cost of \$3.00 to \$3.50 per week.

#### ADMISSION.

Candidates for admission to the institution must present certificates from reputable schools, or take a preliminary examination on entrance. Such preliminary examinations will be held at the beginning of each semester. In every instance testimonials of good moral character must be furnished. For the scholastic requirements, see courses of study as printed in the catalogue. Students offering credits from other schools will be furnished with credit blanks, which they will have filled out and signed by the principal of the school from which they come.

Especial emphasis is placed on the thoroughness of the preparation in common English, and any candidate for matriculation who can not read or spell well is required to enter the classes where these subjects are taught. On the day of registration each teacher will be in his class room to render assistance to any pupil concerning the work of the term or year. After matriculation each student is regarded as a member of the school until excused by the Dean of the Faculty.

#### COURSES OF STUDY.

The courses of study are designed to afford opportunity for acquiring a good general knowledge of a wide range of subjects, embracing ancient and modern languages, mathematics, history, natural science, literature, sociology, ethics and psychology. The aim, in all the courses, is general rather than special culture, and a symmetrical and carefully graduated development, rather than the exhaustive investigation of a few subjects to the neglect of others equally important. Particular emphasis is placed on all those subjects that are regarded as fundamental in education.

#### RECITATONS AND EXAMINATIONS.

Each student must have not less than fifteen nor more than twenty recitations per week, except by special permission of the Faculty. A record is kept by each professor, showing the grade of each student's daily work, and this, together with the result of a thorough written examination at the end of the term, must show an average of at least 70 in the scale of 100 before the student can be passed in any study. Reports of scholarship and deportment are made out for each student at the close of the semester. Any student desiring examination in any subject except at the hour of class examination is required to make application to the Faculty; if the request is granted, a fee of one dollar per recitation hour will be charged. Examinations for conditioned students will be held at the beginning of each semester.

It is very important that students enter classes at the beginning of the semester, and keep in mind that constant, prompt attendance is necessary for the attainment of high grades. Students must not leaves classes, nor take up new studies, except upon written approval of the proper officers.

Students will not be permitted to pursue studies in advance of their class, nor will any one be allowed to take work for which he is not duly prepared. Students in the institution will not be permitted to take lessons from any one ouside the Faculty, except by expressed permission.

Students over nineteen years of age may pursue studies in any department for which they are prepared. Certificates showing the amount and grade of work done by them will be given upon application to the dean of the Department. All substitutions and selections must be of such character as shall not lower the grade of scholarship and culture. The approval of the Faculty, however, must be had in every such instance.

#### LITERARY SOCIETIES.

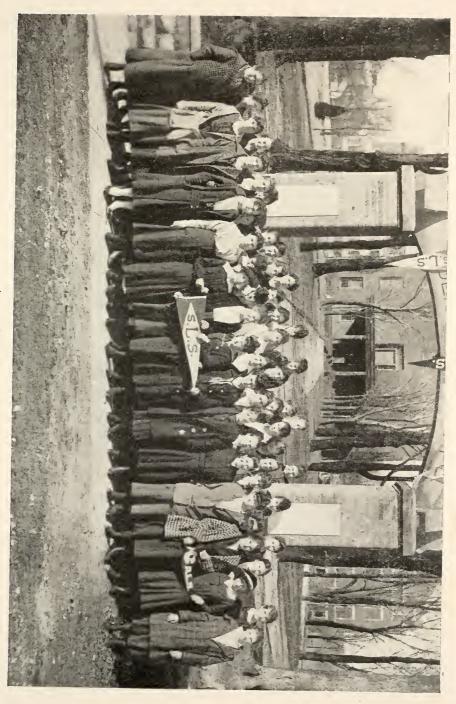

Organized under the laws of the University, there are four literary societies—the Athenian and Philomathean, for gentlemen; the Sapphonian and Knightonian, for ladies. Each has a separate hall for meeting, a large, active membership, and an appropriate library. Experience has demonstrated the value of these organizations in developing the literary taste, as well as ease and gracefulness of expression. The society meetings are held at 7 o'clock on Friday evening of each week.

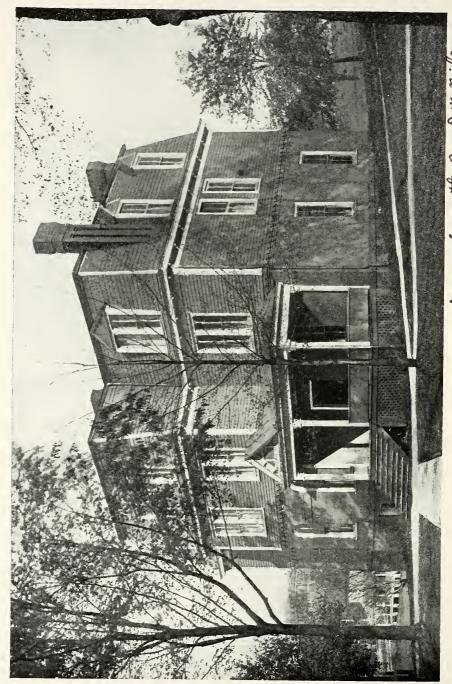

#### THE FOSTER LIBRARY.

Mr. John W. Foster, now deceased, recently made a substantial donation toward the equipment of a library and reading room. For this purpose ample space is utilized in the C. H. Banfield Hall. As opportunity offers additions will be made to the valuable collection of books already in hand. Some of the leading papers and magazines are kept on file, and the appointments of this library are so attractive as to stimulate a taste for wholesome reading.

#### LECTURES.

These constitute a very interesting and valuable feature of school life. Eminent speakers are engaged to address our students, and the professors are frequently heard in "Thursday Chapel Talks,"

BENNETT HALL NEON WHEN the Rec. D. M. Milson Residence Mad. and in some of the departments the lecture constitutes a part of the regular class work.

#### LABORATORIES.

The laboratories of the school, through the generosity and especial interest in Science of Mr. John W. Fisher, of the Board of Trustees, are well equipped. The Chemical laboratory is furnished with twenty-four desks for individual student use, each fitted with running water and sink and supplied with a full complement of reagents for qualitative and quantitative analysis, and among articles of general use contains Startorius Analytical balances, platinum, crucibles, burettes, drying ovens, apparatus for distilling water, and cases well stocked with chemicals and apparatus from year to year and we now have our laboratory equipped with every appliance necessary for thorough work in our courses.

The physical laboratory is equipped with flat-topped tables having suspension frames for supporting purposes and with cases containing apparatus not only adapted to demonstrate the principles of the science, such as barometers, air pump, electric machines, X-Ray and wireless telegraphy, etc., but also enabling the student to make quantitative experiments demanded in Freshman and Sophomore college courses, such as calipers, Milliken's modification of Atwood's machine, calorimeters, photometers, D'Arsonvals galvonometer, etc.

The Biological laboratory and museum contain cases of minerals and rocks, a collection of birds' eggs, skeletons of vertebrates, alcoholic specimens of invertebrates, Kny-Scherer models of the human body, five Bausch and Lamb compound microscopes, each equipped with one-sixth and two-thirds objectives.

The Laboratory is equipped with a Bausch and Lamb Projection apparatus for illustrating geographical, physiological and industrial features. No more valuable accessory than this can be procured in the presentation of these subjects. To get the best results the subject matter must be presented in a more definite form than can

be secured from the printed page alone. The illustrations increase interest, extend knowledge and lead to greater accuracy in thinking.

The school has long been noted for its high moral tone and religious spirit. Most of the students coming here are already Christians, and many who are not become so before leaving. Attendance at chapel and at the regular preaching service on Sunday morning is required. The Sunday school and young people's religious organizations are also helpful auxiliaries, contributing to the development of the spiritual life of the students. The Y. M. C. A. is one of the most helpful influences of the institution. Its object is to make active Christians of those coming within its influence. To this end special services Sunday afternoon are held. Interest in Bible study and Missions is also promoted by the Y. M. C. A. During the year a study was made of the following: "The Manhood of the Master" (H. E. Fosdick).

#### DISCIPLINE.

The method is based upon the requirements of the individual student. Conduct unbecoming men or women of the highest type will not be tolerated. Any student whose influence is deemed harmful to the best interests of the student body will be dismissed after due warning, without the necessity of formulating specific charges against him. We welcome only those whose spirit accords with the purpose we have in view.

#### ATHLETICS.

Athletics are conducted and supported in the interest of all the students. The teams for the various games will be selected after each candidate has had a fair chance to try for them. No place on a team is ever so secure that it can be held without faithful practice and regular class work.

The determination to have clean, bona fide student athletics takes precedence of the passion to win over competing teams. Plenty of wholesome physical exercise simplifies the discipline of the school, and is a legitimate part of a symmetrical education.

We have a good athletic field, with baseball diamond, tennis courts and runnink track. We cherish the hopes that we shall soon have a well equipped gymnasium.

#### EXPENSES.

The entire history of the school has been characterized by the efforts of its Trustees and Faculties to reduce the cost of a liberal education to such low figures that no student need be deterred on account of his financial condition. It is a source of great satisfaction that the efforts made in this direction have been so successful that many students in the humblest circumstances have been enabled to obtain an education.

From the following table of expenses the actual outlay in any department may be readily computed:

Tuition in Preparatory Department, per semester	\$10.00
Tuition in Diploma Course, per semester	15.00
Tuition in Music, 1st and 2nd grades, two thirty-minute lessons per	
Week, per semester	20.00
Tuition in Music, 3rd, 4th, 5th and 6th grades, two thirty-minute	
lessons per week, per semester	25.00
Tuition in Elocution, two lessons per week, per semester	15.00
Tuition in Art, per semester	20.00
Tuition in Violin, per month	5.00
Incidental Fee, paid by all, per semester	5.00
Laboratory Fee in Chemistry, per semester	4.00
Laboratory Fee in Physics, per semester	2.00
Laboratory Fee in Physiology and Physical Geography, per semester	1.00
Laborator Fee in Geology, per semester	2.00
Laboratory Fee in Agriculture, per semester	1.00
Diploma Fee	5.00
Room in Hatfield Hall, per month	2.25
Room in Petty-Manker Hall, per month	3.50
Room for self board, with heavy furniture, per month	1.00
Students board themselves at a weekly expense of	1.00
Room in Bennett Hall, per month	3.50
Board and room in Ritter Home, per week	2.00

NOTE.—The scholastic year of thirty-five weeks is divided into two semesters.

All charges for Tuition, Incidentals and Rents must be paid in advance, and no professor will receive a student into his class except upon the presentation of a ticket showing that a settlement has been made with the Treasurer of the Faculty. Any student who is permitted to take a college study will pay college tuition. No deduction will be made for absence during the last three weeks of any term. By order of the Board of Trustees, and will be rigidly enforced.

#### SCHOLARSHIP AND BENEFICIARY FUNDS.

The Henrietta Banfield Memorial Fund.

The annual interest on five thousand dollars is now available to apply on the tuition of a few needy and deserving students. This bequest is in the memory of the deceased wife of Mr. William Banfield, one of the generous trustees of the institution.

# The A. Caroline Knight Memorial Fund.

By terms of the gift five per cent. of the inventoried value of this fund is given each year to some worthy and needy student or students in the Athens School, as an encouragement and aid in completing a regular course of study.

No scholarships are available for students classified below the first preparatory year. Students expecting scholarships must make good records in class standing and deportment.

# Odd Fellow Scholarship.

The Grand Lodge of Odd Fellows of the State of Tennessee is entitled to four perpetual scholarshps. These are granted to the children of deceased Odd Fellows resident in East Tennessee and chosen as far as practicable, from different sections of East Tennessee, by a trustee of the lodge. The trustee furnishes a certificate of selection which admits the student to the school, provided he otherwise conforms to its regulations. Students entering with these scholarships are perpetually exempt from paying tuition and incidental fees, in the literary department.

The above are the only free scholarships available.

## FREE TUITION.

Only regularly licensed ministerial students and the sons and daughters of ordained clergymen are exempt from paying tuition, but are required to pay all other fees.

#### FINANCIAL AID.

The Board of Education of the Methodist Episcopal Church through its loan fund renders a limited amount of financial aid annually to worthy students who may need it. Application for this should be made to the Dean.

#### THE ALUMNI.

Too much can not be said in appreciation of the service already rendered by this growing institution. Teachers of noble spirit have wrought well through the years. Their names are held in lasting memory by thousands of persons who owe their intellectual awakening to contact with them.

Men and women bearing the diploma of this intsitution are found in all the legitimate vocations of life. They are not unmindful of the advantages given them in the days of self-realization. They do not forget that opportunities for business success, for professional advancement, and worthy service have come to them because the influence of this institution was back of them. The school is proud of her alumni.

#### DEPARTMENTS OF INSTRUCTION

#### LATIN.

The following outline will indicate the scope of the course in Latin:

#### FIRST YEAR.

First and Second Semesters-Pearson's Essentials of Latin.

#### SECOND YEAR.

First and Second Semesters-Caesar; Gallic War, I-IV, Prose composition.

#### THIRD YEAR.

First and Second Semesters—Cicero; Catiline, I-IV; Archias, Manilian Law, Prose Composition.

#### FOURTH YEAR.

First and Second Semesters—Virgil, Aeneid I-VI. Mythology. Prose composition.

 ${f MATHEMATICS}.$ 

Arithmetic.—This subject is taught in a sub-preparatory year, beginning with fractions.

Algebra.—The elements of Algebra are taught during the first semester of the first preparatory year; and

Higher Arithmetic is required during the second semester of the first year.

NOTE.—The mathematics just mentioned are not counted in the making up of units.

#### SECOND YEAR.

High School Algebra during each semester, including the fundamentals factoring, common divisors and multiples, fractions, linear and quadratic equations and their graphs, powers and roots, exponents, radicals, irrational equations, ratio and proportion.

#### THIRD YEAR.

Plane Geometry is required throughout this year in daily recitations. Much attention is given to exercises.

#### FOURTH YEAR.

Algebra.—An advanced course in Algebra during the first semester on roots, radicals, exponents, the progressions, ratio, proportion, variation, logarithms, equations and their graphs, imaginaries and the binominal theorem.

Solid Geometry is taught during the second semester in daily recitations putting emphasis upon the exercises.

ENGLISH.

#### FIRST YEAR.

First and Second Semesters. Composition and Literature for first year pupils. A review of the essentials of grammar is first required. Short themes are written three times a week throughout the year. Many quotations from the best literature are selected for memory work.

Reading: Treasure Island, The Deerslayer, Last of the Mohicans.

Study: Sketch Book, Ivanhoe, Sohrab and Rustum.

Five hours a week during two semesters.

Text: Brook's Composition, Book One.

#### SECOND YEAR.

First and Second Semesters.—Composition and Literature.—The second year student is given systematic drill in applying the principles of unity, coherence, and emphasis in the writing of descriptive, expostory and argumentative themes.

#### CLASSICS.

Reading: Old Testament Stories Silas Marner, Cranford.

Study: Macbeth, Golden Treasury (First Series).

Five hours a week during two semesters.

Text: Brook's Composition, Book Two.

#### THIRD YEAR.

First and Second Semesters.—Composition and Rhetoric. Throughout the year.

#### CLASSICS.

Reading: A Tale of Two Cities, Walden.

Study: As You Like It, Macauly's Life of Samuel Johnson.

Five hours a week during two semesters. Text: Brook's Composition, Book Two.

#### FOURTH YEAR.

First Semester—History of English Literature. This course presents a history of the development of English Literature from Anglo-Saxon times to the close of the Victorian Era. The aim is to create a living interest in all the greater English authors and to teach the student how to read and interpret their works.

#### CLASSICS.

Reading: Selections from Boswell's Life of Samuel Johnson, Selections from the Tatler and the Spectator, Pride and Prejudice, Henry Esmond.

Study: Julius Caesar, Hamlet, Milton's Minor Poems.

Five hours a week during the first semester.

Text: Long's English Literature.

Second Semester.—American Literature.—This is a thorough outline study. The greater American authors are studied much the same as are the British authors in the first semester. A great deal of American literature is read, and the work is concluded with special attention to the great living authors.

#### CLASSICS.

Reading: House of Seven Gables, Select Essays of Emerson, Vision of Sir Launfal.

Study: Poe's Poems, Washington's Farewell Address, Webster's Bunker Hill Oration.

Five hours a week during the second semester.

Text: Halleck's American Literature.

#### JUNIOR YEAR.

First Semester.—Advanced Rhetoric.—This course considers the unit, method, substance, and forms of expression from the aesthetic standpoint; also, a practical application of the acknowledged rules of good style. Biweekly themes, including Description, Narration, Exposition and Argumentation are written.

Four hours a week during the first semester.

Second Semester.—Synonyms and Ehetorical Imagery. To enlarge the student's vocabulary and to develop precision in his choice of diction is the aim of this course. Each student is required to create and to find many examples of the various rhetorical figures. Bi-weekly themes are written.

Texts: Gardiner-Kittredge and Arnold's Composition-Rhetoric and the Independent Magazine.

#### HISTORY.

The importance of a thorough knowledge of history is receiving more and more emphasis in all institutions of learning.

1. History of Eastern Nations and Greece, with a brief introductory sketch of the Oriental nations that influenced Greek civilization.

Five hours a week during the first semester of the second year.

Text: Morey's Ancient History.

- II. Roman History.—Five hours a week during the second semester of the second year.
- III. Bible History.—Studies in the Old and New Testament. Five times a week during the first semester of the junior year.

Text: Blakie's Manual of Bible History.

- IV. European History.—The Renaissance and Reformation. The political history of Europe from the middle of the thirteenth to the close of the Sixteenth Century.
- V. History of England, from the Anglo-Saxon Conquest to the present time. A course in the general history of England.

Five hours a week during the second semester of the fourth year of the Classical Course and junior year of the Literary course.

Text: Cheyney's Short History of England.

VI. American History.—Colonial History to 1756. The development of Colonial and local forms of government and the struggle for North America.

Five hours a week during the first semester of Senior year.

Text: Muzzey's American History.

VII. American History.—The formation of the Union. The political and constitutional history of the United States from 1783 to 1820; the organization and development of the national government; the rise and growth of parties; and the influence of western expansion and slavery on the political life.

Five hours a week during the second semester of the Senior year.

Text: Muzzey's American History and Woodrow Wilson's History of the American People.

While a textbook in history will be used as a basis, it is expected that this textbook will be supplemented by outside reading. Lectures, discussions and the reading of papers on historical topics previously assigned to the student by the instructor will be prominent features of the instruction in this department.

#### POLITICAL SCIENCE.

I. Civics.—A study of the government of the United States, state and national, the American party system and the application of civics to United States History.

Five hours a week during the second semester of the fourth year of the Literary course.

Text: James and Sanford's Government in State and Nation.

II. Economics.—An introductory course in the fundamental principles of economics.

Five hours a week during the first semester of the Senior year.

Text: Bullock's Economics. Brief course

III. Sociology. An introductory study of the nature of society, its complex organism, its bases, structure and function. A study of the work of the leading sociologists, with a comparison of views, and a critical discussion of theories and conclusions.

Five hours a week during the second semester of the Senior year.

Text: Dealey's Sociology.

#### PEDAGOGY.

I. Preparing the Lesson.—Many students, even of advanced grades, have never really learned how to study. There are certain fundamental principles, which, if mastered, will greatly aid the student in the art of studying.

Five hours a week during first semester of the third year of the Normal course.

Text: McMurry's How to Study.

II. Methods of Elementary Education.—A study of the curriculum, materials and methods of instruction in primary and grammar grades. The organization of the subject matter with special regard to the needs of the pupils and the school community.

Five hours a week during the second semester of the third year of the Normal course.

III. History of Education.—This course, beginning with education among the early cultured people, describes the principal factors in the development of education.

Five hours a week during the first semester of the fourth year of the Normal course.

Text: Seeley's History of Education.

IV. Psychology.—A study of the main facts and laws of mental life, seeking to acquaint the student with the normal human mind, and to train in accuracy of observation and right interpretation of results.

Five hours a week during the second semester of the fourth year of the Normal course.

#### SCIENCE.

#### SCIENCE.

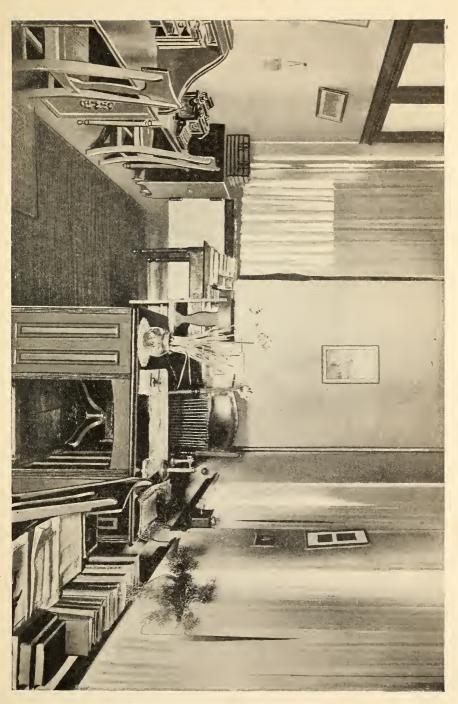

First Semester.—Physiology.—Davidson's "Human Body and Health." A text and laboratory course in the structure of the body, its care, and sanitary conditions of everyday life. The laboratory course takes up the study of foods, the study of bacteria, the study of slides prepared for microscopic work and the study of the digestive processes.

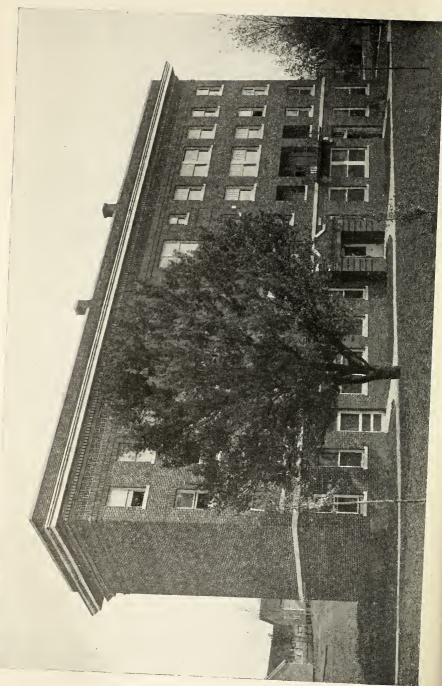

Second Semester.—Physical Geography.—Tarr's New Physical Geography, with Tarr and Von Englen's Laboratory Manual. This course includes the text work, field work and laboratory course designed to develop in the student the ability to recognize land forms, the work of nature in carving out land forms, and the work of man and his relation to the soil. For this work, and for the work in Physiology the laboratory is equipped with a Bausch and Lamb Projective apparatus. Frequent lectures and demonstrations are given, using this instrument to cast on the screen photographs and drawings of subject matter discussed.

#### SECOND YEAR (NORMAL COURSE).

First Semester.—Agriculture.—A study of the soil, plant life, farm crops, trees and gardens, plant diseases, insects and birds, nitrogen fixing, bacteria, manures and fertilizers and crop rotation. This course includes field work, laboratory and text.

Text: Halligan's "Fundamentals of Agriculture."

Second Semester .-- Agriculture .-- A study of live stock and their relation to the farm, including general principles of stock feeding, milk production, beef cattle, sheep, hogs, poultry and horses. The aim of this course is to give to students practical ideas of successful farming, to show them how farming may be made both pleasant and profitable, and to teach them that there is today no broader field for life's work than farm life offers.

Text: Smith's "Profitable Stock Feeding."

Courses in Domestic Science also will be offered during this year. In addition to the above, courses in Agriculture and Domestic Science will be offered during the third and fourth years of the Normal course.

#### THIRD YEAR.

First Semester.—Chemistry.—A course intended to teach the student the principles of simple chemical reactions. A course on the general principles of chemistry, both inorganic and organic, consisting of recitations, lectures and laboratory work. Two recitation periods a day are given to the subject, one-half of the time being devoted to individual work in the laboratory under the direction of the instructor.

Second Semester .- Chemistry .- A continuation of the above course and in addition to this a study of chemical reactions and problems. During this semester instruction is given the students enabling them to test substances for the presence of elements or compounds, and to apply simple tests for adulterations in foods.

Texts: Newell's "Descriptive Chemistry" and Baskerville and Estabrook's "Problems in Chemistry."

#### FOURTH YEAR.

First Semester.—Physics.—Five recitations per week, covering properties of solids, liquids and gases, heat, electricity, sound and light. For entrance in this course algebra and plane geometry are prerequisites. In addition to this, the student spends five hours per week in the laboratory making experiments to verify and illustrate the general subjects of the course. Accurate records are kept of all this work and the record must be approved by the instructor.

Text: Carhart and Chute's "First Principles of Physics."

Second Semester .- Physics .- A continuation of the work of the first semester and in addition a study of problems based on the principles of physics. The student is given practical work in applying the principles of heating, lighting, making drawings to illustrate his work. A practical study of the applications of the electric current is given, a study of electric machinery and instruments is also made.

Text: Hill's "Essentials of Physics."

Junior year left out

#### SENIOR YEAR.

First Semester.—Chemistry.—An advanced course based on Kahlberg's "Outlines of Chemistry," on Newth's Qualitative and Quantitative Analysis. Ten periods a week are given to the subject, one-half of the time being spent in the laboratory. Chemical problems and equations are given the student. Fifteen analyses are made to determine the composition of given compounds.

Second Semester.—Chemistry.—A continuation of the work of first semester. Chemical analysis, both qualitative and quantitative. The student is taught both volumetric and gravimetric methods in determining the composition of compounds. A special study of Analyses of iron ores, gas analysis, copper and zinc ores is made. Industrial applications of analytical chemistry are made a special feature.

#### GERMAN

- I. First year German. Two semesters. Five times a week.
  - First Semester.—Oral lessons. Elementary grammar. Class exercises are conducted, as far as possible, in the German language.
  - 2. Second Semester. Oral lessons continued. Grammar.
- II. Second year German. Two semesters. Five hours a week. The following books are read in this course:
  - First Semester.—Storm, Immensee; Heyse, L'Arrabbiata; Das Madchen von Treppi; Zschokke, Das Abenteur die Neurjarhsnacht Kreuz und Quer.
  - Second Semcster.—Keller's Second Year in German; Goethe, Hermann and Dorothea; Schiller's William Tell; Lessing, Minna von Barnheim. Advanced grammar.

#### GERMAN CLUB.

"Der Deutsche Bund," an organization of the students of this department, meets once every two weeks. The object of this club is to create an interest in German Life, Folk-Songs and German Literature.

#### FRENCH.

- I. First year French. Two semesters. Five times a week.
  - 1. First Semester.—Oral lessons. Elementary grammar.
  - Second Semester.—Oral lessons continued. Reproduction of texts read in class. Elementary grammar.

- II. Second year French. Two semesters. Five times a week.
  - First Semester.—Modern prose. Selections from French prose
    of the nineteenth century. Oral productions and written composition. Review of Grammar.

The following texts are used: Dumas, La Tulipe Noire, Le Comte de Monte Crinto; Fontaine, Douze Contes Nouveau; Maupassant, Contes.

 Second Semester.—Le Voyage de M. Perrichon; La Poudre aux Yeux; La Grammaire; La Bataille de Dames; La Gendre de M. Poirer; L'et de Saint Martin, La Lettre Charge. Also, Daudet, La Belle Nivernaise, and Mallot, Sans Famille.

Reproduction in story form. Advanced Grammar.

#### FRENCH CLUB.

Cercle Francais, similar to the German Club, meets everey two weeks on Tuesday night.

EXPRESSION so not in any Course

The purpose of this department is to teach the dignity and value of the art of expression, to ascertain the principles governing vocal expression by careful observation of nature in its best manifestations, and to send forth pupils so trained as to be capable of analyzing and adequately expressing that which is most beautiful in language and literature.

#### DEPARTMENT OF AGRICULTURE

offers seven thoroughly practical courses in general agriculture, soils, crop production, animal husbandry, dairy husbandry, and poultry husbandry. Each of these courses is complete in itself and gives instruction and practice in the most important divisions of agriculture.

The student fixes in mind by actual practice the methods presented in the class-room, and returns to the home farm with information which he can put into immediate practice. The Athens Department co-operates with the Tennessee Experiment Station and with the U. S. Department of Agriculture.

#### Courses in Agriculture.

Agriculture I.—Beginning Course.—This course covers in a general way the study of soils, farm crops, animal husbandry, dairy husbandry and horticulture. The lectures are intensely practical, dealing directly with problems the average farmer is sure to meet. Selection and care of seed corn, inoculation of alfalfa and other legumes, systems of soil treatment and crop rotation for Tennessee operation of the Babcock Test, best methods of spraying fruit, the farmer's vegetable garden, problems in feeding livestock and other practical subjects will be discussed. Two lectures per week. Open to all students. This course covers both semesters. No text is required.

Agriculture II.—Soils.—A thorough study of the physical and chemical properties of the soils of the South. A permanent and practical system of soil improvement which any farmer can and should practice. Tile drainage, correction of soil acidity, supplying organic matter and phosphorus, crop rotation with reference to soil fertility and the practical application of the above named processes, make up this course. Laboratory work includes field inspection and testing of soils as well as experiments conducted in the laboratory. Text is Soil Fertility and Permanent Agriculture by Hopkins. Three lectures and two laboratory periods per week.

Agriculture III.—Farm Crops.—Laboratory, class-room and field study of the principal farm crops; cultural requirements of corn, wheat, oats, cotton, tobacco, and the leguminous crops. Practice in the selection, testing and grading of seed corn; treating oats for smut; inoculation of the legumes, and identification of weed seeds. A thoroughly practical course embodying practices any farmer may employ to advantage. Given each semester. Laboratory fee, \$1.00.

Agriculture IV.—(Second Semester only).—Judging Livestock.
—Principles and practice of stock judging-horses, cattle, swine and sheep. Text: Craig's Judging of Livestock. Laboratory fee, \$1.00.

Agriculture V.—(First Semester only).—Principles of Stock Feeding.—Study and practice in computing and feeding balanced rations. Most economical and efficient feeds for horses, cattle, sheep and swine. Laboratory fee, \$1.00.

Agriculture VI.—Dairying.—The sanitary production of milk and milk products. Practice in the use of the Babcock Test and in the manufacture of butter, cheese and ice cream. Three laboratory and two lecture periods per week, given first semester only.

Agriculture VII.—Poultry Husbandry.—Feeding, housing and caring for farm poultry. The operation of the incubator and brooder. Methods of selecting layers—practice in caponizing. Three laboratory and two lecture periods per week. Laboratory fee, \$1.00. Given second semester only.

#### MUSIC-PIANO.

No strict course can be outlined, as the teacher must look to the development of the individual pupil. This course shows the requirement, so that its equivalent may be used if necessary.

All students should take the theoretical course, which cultivates sound musicianship. This course consists of Harmony, Theory, History (musical) and Sight Singing.

Pupil's recitals will be given for the development of self-confidence. The Moffitt Music Club will be a feature in the music life of the student. Here pupils will gain a broader idea of this art. All pupils appear at the club once a month.

A class in ensemble playing will be organized. The Leschetizky technique is used through all the grades. The Caruther's Method will be used with the children.

A normal class, where advanced pupils teach beginners under the supervision of the principal, will be of great assistance to those who wish to make the teaching of music a profession.

Much is being said of the benefit of the sound-producing machines. There is in connection with the music department a Vic-

trola, which is used at the Music Club meetings, and every two weeks a lecture recital is given in the chapel on this instrument. In this way all students may become familiar with the greatest musical compositions. A great interest has been shown in these recitals by the large and attentive audiences, confirming the fact that music is innate in all, and that it is the greatest single force in the education of the whole man.

#### VOICE CULTURE AND THE ART OF SINGING.

Voice Training, implying principles of breathing, voice placing, elementary vocalization, enunciation and sight reading, inequalities of the voice (called registers) made even by proper practice. Songs selected from the best composers, suitable for the needs of the individual pupil, given at the teacher's judgment.

#### DOMESTIC SCIENCE.

#### COURSES IN SEWING.

- 1. Elementary Sewing.—Plain sewing, stitch forms, hemming, seams, bands, sewing on buttons, hooks and eyes, patching, darning, sewing on lace and embroidery, etc. Two periods each week.
- 2. Advanced Sewing—Undergarments, shirtwaists, skirts and dress-making. Two periods each week.

Students are required to furnish all working materials, such as scissors, thimbles, thread, needles, etc.

For students not living in Ritter Home a fee of one dollar a semester will be charged for sewing lessons.

- A department of Household Economics has recently been added consisting of the following courses:
- 1. A study of foods and the principles involved in their preparation. Two double periods a week. Laboratory fee fifty cents a semester.
- 2. A study of the home including work in the study in the Household Sanitation, Management and Decoration. Three recitation hours a week
- 3. A continuation of Course 1, including work in advanced cooking and the planning and preparation of meals. One afternoon a week. Laboratory fee one dollar a semester.

A limited number of students not living in Ritter Home will be admitted to any of the classes. Fee three dollars, Courses 1 and 3.
